

## Matetsi Hunting Area (Extended Conservation Area)

The Matetsi ECA is situated in the north western part of Zimbabwe and is adjoined directly to Matetsi Unit 1, Unit 4 and Hwange National Park, Zimbabwe's largest National Park. The Matetsi ECA is a merge of 3 past game ranches that are unfenced of each other and share unfenced borders with Matetsi Unit 1, Unit 4 and Hwange National Park to form around 80 000 Acres of safari area in extent.

A big difference between the Matetsi ECA and other Matetsi Units is that the ECA permits night hunting of nocturnal species whereas the other Matetsi Units do not. The Matetsi ECA is also a prolific Buffalo area with a good change of getting a large trophy bull. Elephant hunting is also very successful in the area. Matetsi is also well known for its big Tom Cats, full maned Lions, large Sable Bulls and massive Livingstone Elands. The game movement in the ECA is excellent due to lots of water and the success rate is close to 100% for all large game animals.

The camp is a short 45 minute drive from Victoria Falls International Airport where you will be welcomed to the wilderness of Africa! The hunting areas' proximity to Victoria Falls also makes it possible for day trips.
